# Why we are here

## Discovering Collective Wisdom

To “...bring out the best in us...[our] conversations take us into a new realm, one that has been forgotten in modern, individualistic cultures. It is the realm of collective intelligence, of **the wisdom we possess as a group that is unavailable to us as individuals.**

## Why we are here

“This wisdom emerges as we get more and more connected with each other, as we move from conversation to conversation, carrying the ideas from one conversation to another, looking for patterns, suddenly surprised by the insight that we all share. There’s a good scientific explanation for this, because this is how all life works...

# Why we are here

“As separate ideas or entities become connected to each other, life surprises us with emergence - the sudden appearance of new capacity and intelligence. All living systems work this way. We humans got confused and lost sight of this remarkable process by which individual actions, when connected, lead to much greater capacity”

(The World Café: Shaping Our Future Through Conversations That Matter, 2005)
